**Profile added-value**

- Over two years of experience in software development
- Evident advanced coding skills in C++ or Java
- Strong skills on object oriented design experience, including working knowledge of core libraries and software design patterns
- Experience of working through software development lifecycles

### **About WIT Software**

WIT-Software is a software company that creates smart applications and services for telecommunication and media companies. WIT provides technical consulting and software development for any company that wants to exploit the power of Mobile and Fixed Communications. The expertise on mobile technologies and software development allows us to deploy products and services for the mobile consumer and enterprise markets. We can provide enterprise application integration, develop application servers, client software for mobile phones, PC, game consoles and TV set top boxes. Our excellence in these areas has lead to strong strategic partnerships with companies like Vodafone Portugal, for whom we have been developing software products since day one.
