

Talented people. Global opportunities. Connected.

Expert Network Planning and Optimization Engineer (Alfragide)

To help us unite people through our communication solutions, we need talented people who thrive on the challenge of a global career. At Nokia Siemens Networks, we offer a rewarding opportunity: the chance to work in new places and learn from the diversity of their people and cultures.

Job responsibilities

Network Planning and Optimization (NPO) is a strategic department at Nokia Siemens Networks. Service Delivery Center (SDC) is part of Global NPO. In SDC, people will develop and ensure planning and optimization activities remotely from Lisbon offices to Nokia Siemens Networks projects throughout the World. Several technological aspects can be addressed, either Access, Radio, Core or Transport networks, Packet or Circuit Switched. NPO Global hosts Services for Network Design, Network Optimization, End user Service Optimization, Customer Performance Services, Capability Management, Tools, Quality and Operational Development.
