

With offices in Hungary and Switzerland, **Cambridge Technology Partners** is helping today's leading international companies to make the right decisions, manage change with success and leverage their competitive advantages by delivering strategic IT applications.

We need you! People with specific skills, competencies and mindsets able to play different roles inside the Cambridge proven methodology. Our priority is to help you becoming an accomplished and excellent consultant by offering continuous training, coaching and mentoring in order to ensure your professional growth within Cambridge Technology Partners.

We are currently looking for a **.NET Developer (M/F)** to join our team.

We will be interviewing candidates over the next few weeks and can offer an immediate start.

Position Summary

The mission is to participate in the maintenance and evolutions of a custom .NET based application. You will have to demonstrate a good ability to work independently with accurate results, while maintaining a strong team dynamic. You will mainly be working on 3rd level support activities.

Skills required

- Knowledge of .NET (2.0/3.5/4.0), and MS SQL Databases (2005, 2008) (**SSRS** = must have)
- Experience in coding in VB.NET, ASP.NET/AJAX
- Knowledge of Microsoft Enterprise Library (3.1) is a plus
- Knowledge of Infragistics NetAdvantage or Silverlight a plus
- Knowledge of TFS a plus
- Team oriented
- Quality oriented
- Analytical mindset and problem solver oriented

Experience

At least 3 years of experience in relevant technologies (.NET, MS SQL incl. SSRS)

Education & Languages

B.Sc. in Computer Science, Software Engineering or related field

Good level of both spoken and written English
