

JOB POSITION: JUNIOR / SENIOR ENGINEER (CS, ECE)

Company: Veniam'Works, <http://www.veniamworks.com>

Veniam turns any vehicle into a hotspot, puts data in the cloud, and builds a wireless network between vehicles that can be leveraged for business, safety and entertainment.

Veniam's Portugal offices are located in Aveiro and Porto, with US headquarters in Cambridge, MA.

Job Description

We are seeking highly talented and entrepreneurial engineers with strong skills in two or more of the following areas:

- Network protocols
- Network deployment and operations
- Security
- Network management
- Performance monitoring and analytics
- Kernel and OS
- Cloud-based platforms
- Android / iPhone Apps
- Technical sales
- Customer support

If you have expertise in these areas and you want to architect, develop, deploy or operate communication solutions for global markets, including telecom, automotive, transportation and logistics, this is the opportunity you are looking for.

We seek both junior candidates (less than five years of experience) and senior candidates (five or more years of experience).

AN INTERNET OF VEHICLES

Key Responsibilities:

- Design, develop, deploy, manage and/or test system software and mechanisms for vehicular networking products and intelligent transportation systems;
- Work closely with product management, software developers and quality teams on feature specification and release milestones;
- Perform unit and platform testing to ensure high-quality performance.

Qualifications Experience & Educational Requirements:

- BSc or MSc on Computer Science, Communications Engineering, or similar;
- Strong background on networking protocols;
- Development experience using C/C++ or Java or Android or IOS;
- Experience in system-level programming and expertise in UNIX/Linux environments are a plus;
- Knowledge of web architectures and services (HTTP, SOAP, REST, JSON, etc.) and scripting languages (Perl, Python, Ruby) is a plus;
- Must have excellent problem solving skills and critical thinking;
- Must be self-motivated, autonomous and able to multi-task.
-

Additional Information:

Job Location: Aveiro or Porto (Portugal)

Position Type: Full-time

We offer a competitive compensation package (including stock options) as well as an internationally oriented environment conducive to personal and professional growth.
