- [NOTE:It had who,of little rigorous form,or tendenteous,wanted to make to pass the idea from that Loriga alone received the charter one D.Manuel I,being arrived to attribute to that king dated documents of 1474 and 1477[D.Manuel I initiated ts reign in 1495],and affirming to be oldest with references Loriga,in a forced attempt to erase the historical and municipal past of the town,previous to century XVI [important documents had disappeared of strange and convenient form and had invented history to suit],thus trying also to justify and legitimize the great injustice of that Loriga was victim in 1855!In this year,the revenge politics and intrigues it moved by expansionists desires,had dictated the end of the Municipality of Loriga.

It was also written that Loriga would have appeared originally in a place known by Chão do Soito where existed a species of "provisory Loriga",Only later the habitants if would have of the error of the choice of that place and if they would have moved for the current localization,there to the side!Given the characteristics of the Chão do Soito,compared with the ones of the place where of Loriga fact it was established,alone who knows little or does not know nothing about history,and consequently it is unaware of the habits of the populations of the time,or wants to insult them,it is thatit can affirm such thing!It is a theory ridicule that only serves to denigrate the image of ancestors of the Loricenses,sending them for the world of the anecdotes:"Not thinking and slow which "little heads not thinkers" had established a village,and alone later they had understood that they had made it in the wrong place and to the side of the ideal place,against the logic of the time!"By the way,at no time the hill where the historical center of Loriga exists,would be neglected and changed for the other place!

These and other ideas meaningless had been copied by others and are seen written by there,giving a wrong idea of the history of Loriga] -
